Figure 1 is a phylogenetic tree illustrating the evolutionary relationships between various taxa. The tree is rooted at the top left and branches out extensively. Taxa are labeled with letters (A, B) and numbers (1, 2, 3, 4, 5, 7, 8, 9, 10, 16, 17, 19, 25, 28, 37, 39). Some labels are in bold. A scale bar at the bottom right indicates '2018-2020²'. A small box with a cross and an arrow points to a specific node in the tree.

VI. Risk Factors and Risk Management

Macro-environmental Risk

A significant risk factor for the Company is the impact of macro-environmental risks, which are risks that arise from external factors that are beyond the Company's control. These risks include changes in the global economic environment, political instability, and natural disasters. The Company has implemented a risk management framework to identify, assess, and mitigate these risks. This framework includes a regular monitoring of the global economic environment and political stability, as well as the implementation of contingency plans in the event of a natural disaster. The Company has also established a risk management committee to oversee the implementation of the risk management framework. The committee is composed of senior management and external experts, and it meets regularly to review the Company's risk management strategy and to make recommendations on how to mitigate risks. The Company's risk management framework is designed to ensure that the Company is able to identify and mitigate risks in a timely and effective manner, thereby protecting the Company's financial performance and its ability to continue to operate successfully.

A significant risk factor for the Company is the impact of macro-environmental risks, which are risks that arise from external factors that are beyond the Company's control. The Company's risk management framework is designed to ensure that the Company is able to identify and mitigate risks in a timely and effective manner, thereby protecting the Company's financial performance and its ability to continue to operate successfully.

Policy and Regulatory Risks

The Company is exposed to policy and regulatory risks, which are risks that arise from changes in government policies and regulations. These risks include changes in tax laws, trade regulations, and environmental regulations. The Company has implemented a risk management framework to identify, assess, and mitigate these risks. This framework includes a regular monitoring of government policies and regulations, as well as the implementation of contingency plans in the event of a change in policy or regulation. The Company has also established a risk management committee to oversee the implementation of the risk management framework. The committee is composed of senior management and external experts, and it meets regularly to review the Company's risk management strategy and to make recommendations on how to mitigate risks. The Company's risk management framework is designed to ensure that the Company is able to identify and mitigate risks in a timely and effective manner, thereby protecting the Company's financial performance and its ability to continue to operate successfully.
